might be noted where the type changed hands, passing from a printer in one to order at 11 o'clock a. m., by Lewtown to a less prosperous workman in is Green, of Hocking. another. So soon as the new printer had made a fair start he generally

cedingly, and it is possible, without seen to belong to a certain district or Barker, Hocking. period. The variedes in each group may have arisen from various causes. Some are due to the necessity of having announced: types of different sizes, some to alterations found advisable to avoid unnecessary wear and tear; some were, no doubt, made with a view to greater distinctness in the printing. One very common kind is one of the most difficult to detect. A font of type, we will imagine, had been used till it began to wear out. To save trouble in molding the dies for a new set, the printer chose Perry. out an alphabet from the old ones, and with a knife trimmed the letters to make them sharp and distinct, cutting off a detail here and there, and generally making the outline somewhat thinner. From these he cast dies which were used to strike off a fresh set. The font thus manufactured would closely resemble its predecessors, differing from it alone in details not readily perceived. The relations existing beween wood cutters and printers are not so easy to discover. The French wood cutters had from the very first adopted a style completely different from that either of the Germans or Dutch. Their | der was to hear the reports of the blocks were always much more uniformly filled with even masses of careful shade; there were no large spaces lert unoccupied and white on the paper. The were far ahead of their contemporaries in neatness and dexterity, but the several counties were fully rep. 20078 & SEOES there was little life in their work. As resented and no contests. The rea result, nothing great ever came from them; but all their early productions are pleasing, and contrast agreeably with the rude work of their foreign contemporaries. Very few of their blocks years Gerard Leen constantly uses a set of cuts and borders which present a marked difference from anything he

(Continued from last week.) How Watch Cases are Made.

In 1875, thirteen men comprised the entire working force used in the manufacture of the James Boss' Gold Watch Case. Now over five hundred are employed, and the number is constantly increasing. The reason of this increase is this: In the James Boss Gold Watch Case all the metal in sight Tailoring. and subject to wear is solid gold, while the re-mainder, which only lends strength to the J. CRESAP case, is of stronger metal than gold, giving gold where gold is needed, and strong, elastic metal where strength and elasticity are needed, a combination pro-ducing a watch case better than solid gold and at ONE-HALF the cost.

Over 200,000 of these cases
have been sold, and every jeweler in the country can testify to their quality and

merit.

LUDINGTON, MICH., Dec. 5, 1882.

E. W. Marsh, of the Democrat, bought a Jan Boar' Gold Watch case 18 years ago, and carried it until a short time ago, when I purchased it, and sold it to a customer. The case showed no signs of wear, except that natural to any case, and I am satisfied can be safely guaranteed for at least ten years more. I have sold the James Boss' Gold Watch Case for many years, and the parties who bought the first ones are carrying them to day, as well satisfied as though they had bought a solid gold case oosting twice the money. I regard them as the only cases of this kind a jeweler should sell who desires to give his customers the worth of their money or views his reputation.

AYER'S Cherry Pectoral.

No other complaints are so insidious in their attack as those affecting the throat and lungs: none so trifled with by the majority of sufferers. The ordinary cough or cold, resulting perhaps from a triffing or unconscious exposure, is often but the beginning of a fatal sickness. AYER'S CHERRY PECTORAL has well proven its efficacy in a forty years' fight with throat and lung diseases, and should be taken in all cases without delay.

A Terrible Cough Cared. "In 1857 I took a severe cold, which affected my lungs. I had a terribic cough, and passed night after night without sleep. The doctors gave me up. I tried AYER'S CHERRY PECTORAL, which relieved my lungs, induced sleep, and afforded me the rest necessary for the recovery of my strength. By the continued use of the PECTORAL a permanutement was effected. nent cure was effected. I am now 62 years old, hale and hearty, and am satisfied your CHERRY PECTORAL I Saved me.

HORACK FAIRBROTHER."

Rockingham, Vt., July 15, 1882.

Oroup. - A Mother's Tribute. "While in the country last winter my little boy, three years old, was taken ill with croup; it seemed as if he would die from strangu-lation. One of the family suggested the use of AYER'S CREERY PECTORAL, a bottle of which was always kept in the house. This was tried in small and frequent doses and was tried in small and frequent doses, and to our delight in less than half an hour the little patient was breathing easily. The dos-tor said that the CHURRY PECTORAL had eaved my darling's life. Can you wonder at our gratitude? Sincerely yours, Dur gratitude? Sincerely yours, Mrs. Emma Gedney." 150 West 128th St., New York, May 16, 1882. "I have used AYER'S CHERRY PECTORAL in my famile for several years, and do not hese take to pronounce it the nost effectual remedy for coughs and colds we have ever tried.

A. J. Chane."
Lake Grystal, Minn., March 13, 1882. "I suffered for eight years from Bronchitia, and after trying many remedies with no suc-cess, I was cared by the use of AVER'S CHER-RY PECTORAL. JOSEPH WALDEN." Byhalia, Miss., April 5, 1882. "I cannot say enough in praise of AYER's CHERRY PECTORAL, believing as I do that but for its use I should long since have died from lung troubles. E. BRAGDON." from lung troubles E. BRA Palestine, Texas, April 22, 1882. No case of an affection of the threat or

(Centinued from last week.) How Watch Cases are Made.

This process of manufacture was invented by James Boss, who started in business in 1854, and the methods and tools used in making those watch cases are covered by patents. This is the only watch case made under this process. For many years the introduction of these goods was slow, owing to popular prejudice against "plated" goods, but gradually the public learned that the James Boss' Gold Watch Case was not a cheap gold-washed or electro-plated article, but was made of genuine gold plates of standard quality and thickness. Conscientions adherence to the determination to make the best watch case ever put on the market, and the adoption of every improvement suggested, has made the James Boss' Gold Watch Case the STANDARD. In this watch case the parts most subject to wear-the bow, crown, hinges thumb-catches, etc., are made of solid GOLD.
